

### SPECIFICATIONS

Touch-free electronic W.C. flush valve with a mechanical override button. Activated by a dual flush infrared sensor. Stain steel panel. Shut-off valve, filter and a low battery indicator are included. Powered by a 9V battery or 9V transformer. With a 24-hour hygiene flush. Adjustable settings by remote control: sensor range, security time, delay in, delay out, on-off and reset to factory settings. Low water consumption options and pre-flush operation are available upon request.

### OPERATION

Touch-free electronic W.C. flush valve. Water will flush after the user moves away from the toilet. If the user spends less than one minute in front of the sensor, a half flush (3 liters) will take place. For more than one minute, a full flush (6 liters) will take place.

### APPLICATION

Helps washrooms stay clean and saves water. Ideal for educational institutions, gas stations, restaurants. In addition, its minimalistic style makes it perfect for any locations with high design standards.
