

MIRANDA R ESPUMA SOAP DISPENSER

TOUCH-FREE ELECTRONIC FOAM DISPENSER FOR PROFESSIONAL SYSTEM

SPECIFICATIONS

Touch-free electronic foam dispenser for deck-mounted installations. Activated by infrared sensor. For use with any non-proprietary soap. Chrome plated body, other finishes available. Connects to a central soap multifeed system (which can support up to six soap dispensers simultaneously).

With a designated peristaltic pump that prevents clogging and back flow. Remote installation option: extension cable and longer piping. Adjustable settings by remote control: soap quantity, soap tank refill, temporary off and reset to factory settings.

OPERATION

Touch-free electronic foam dispenser operated by infrared sensor. The foam dispenser automatically activates when users place their hands within sensor range, providing a measured amount of soap (adjustable by remote control). If the users remove their hands before the full amount is dispensed, the soap dispenser immediately stops the soap flow.

APPLICATION

With the dripless automatic shutoff, this foam dispenser helps washroom organization and cleanliness. Combined with the touch-free electronic faucet, it creates a germ-free automated environment.
